NOTE When mounting the lock the installation instruction has to be followed.

The outer dimensions, bolts and security relevant points of the 1000, 2000 and 3000/3010/3011 types of the PRIMOR series differ from each other. Therefore, every type must be assessed and added separately during integration into the lock list of the secure storage unit concerned. A differentiation between Level 5, Level 15 and Level 25 is not necessary.

The following input units may be used: FL (for 1000, 3000, 3010 and 3011), FS (for 1000, 3000, 3010 and 3011) and RO (for 1000, 2000, 3000, 3010 and 3011).

The PRIMOR 3000/3010/3011 is also available in a thinner design. The PRIMOR 3011 is usable with an emergency lock, the PRIMOR 3010 with the emergency lock N-1821 (see 1210/HSL12-01B).

The marking as ECB•S certified product, in compliance with this certificate, is only allowed with an original ECB•S certification mark as proof of conformity according to ISO/IEC 17065.
