

Description

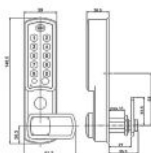

PIN code lock for 1 permanent user.

The ELLcam Classic1.2 is excellent for use on lockers and other furniture in fitness clubs, schools and universities, hospitals, offices, hotels, etc.

Universally usable left / right. Also available in horizontal version

Properties

- Housing is made of black plastic, which makes it more resistant in a humid environment.
- 1 user code to be set by yourself.
- 1 Master code, 6-digit.
- Blocking after 4 incorrectly entered codes.
- In this way, manipulation is extremely difficult, if not impossible.
- Can be used both left and right turning
- Improved core construction
- Battery opening on the back
- Emergency power supply by means of 9 volt block battery contacts on the control panel.
- Printed circuit board (PCB) with Microprocessor based on SMD technology.
- Compact dimensions with very easy installation.
- Easy conversion from standard plate cylinder.
- Comes standard with battery (calculated).
- Suitable for a door thickness of up to 18 mm.
